

## Appendix A: Prototype website screen captures.

*Screen capture #1*: Home page for Bloomington, with energy intensity scale. Number of points displayed is limited to 100 per screen; zooming in will cause additional locations to appear. Similar maps are available for Ann Arbor, Columbia, and Evanston. The green marker is a test location showing the color change when data is entered.

*Screen capture #2*: Property pop-up window for individual property. Later this will include basic details like number of bedrooms, monthly rent, and, eventually, a sustainability score.

Screen capture #3: Property details page.

Screen capture #6: Account creation page

Screen capture #5: Data upload page for registered users.
